

PROFESSIONAL RESUME

Brad A. Bohler, PE

Principal

Brad has more than a decade of experience in site civil engineering design for land development projects throughout the State of New Jersey. As Principal of Bohler Engineering, Brad is responsible for project management, quality assurance, team development and client communication. His portfolio of experience includes commercial, industrial, and residential developments.

From initial due diligence through project completion, Brad drives all project phases. His experience with site design, permitting and regulatory agency coordination enables projects to remain on schedule and within budget. He strategically guides the project progression through design development, approvals and construction.
